

OUR HISTORY

Iran Dena, established in 1966 as part of the Unitrans Group, is a trusted name in Iran's logistics and transportation industry. With nearly six decades of experience in air, land, and sea freight, we combine local expertise, international capabilities, and a strong commitment to integrity and service excellence.

WHY OUR COMPANY

MULTI-MODAL TRANSPORT

From complete turnkey infrastructure projects to managing individual parts of an overall project, Iran Dena can offer its technical equipment, management and expertise .

With extensive experience in international transportation, we provide reliable and efficient logistics solutions .

UNITRANS- IRAN DENA
is ready to assist you
with all your
transportation and
logistics inquiries, from
various origins to
destinations worldwide.

SERVICES

1. Planning and Organization
 - Choosing the right transportation mode
 - Routing and Scheduling- road survey
 - Freight Consolidation
 - Documentation
 - Customs Clearance
2. Transportation and Logistics
 - Booking and Negotiating
 - Cargo Handling
 - Warehousing and Storage
 - Tracking and Monitoring

HEAVY LIFT TRANSPORT

Shipping and logistics needs do not always fit the standards. We offer tailored oversized cargo transportation of heavy- or mega-heavy, as well as flexible worldwide project solutions by sea, air, and land.

HEAVY LIFT EQUIPMENT

- 180 hydraulic Axles (Goldhofer, Nicolas, ...)
- specific trailers (Mack, Volvo)
- extendable trailers
- special lowbed trailers

ROUTE PREPARATION

We remove road obstacles such as power cables, signs, pedestrian bridges, and other structures to ensure safe passage for heavy and oversized cargos.

By Pass Construction & Road Building

We build temporary bypasses and roads to pass obstacles such as rivers, railway tracks, bridges... making it possible to safely move heavy oversized cargos .

JACKING & INSTALATION

Cargo is safely discharged at the port using heavy-lift cranes and specialized lifting systems. We manage the complete transportation from port to jobsite through engineered heavy-haul solutions. At the jobsite, hydraulic jacking and temporary support systems ensure controlled positioning and elevation. Final erection is performed with precision, placing the equipment safely onto its designated foundation.
